

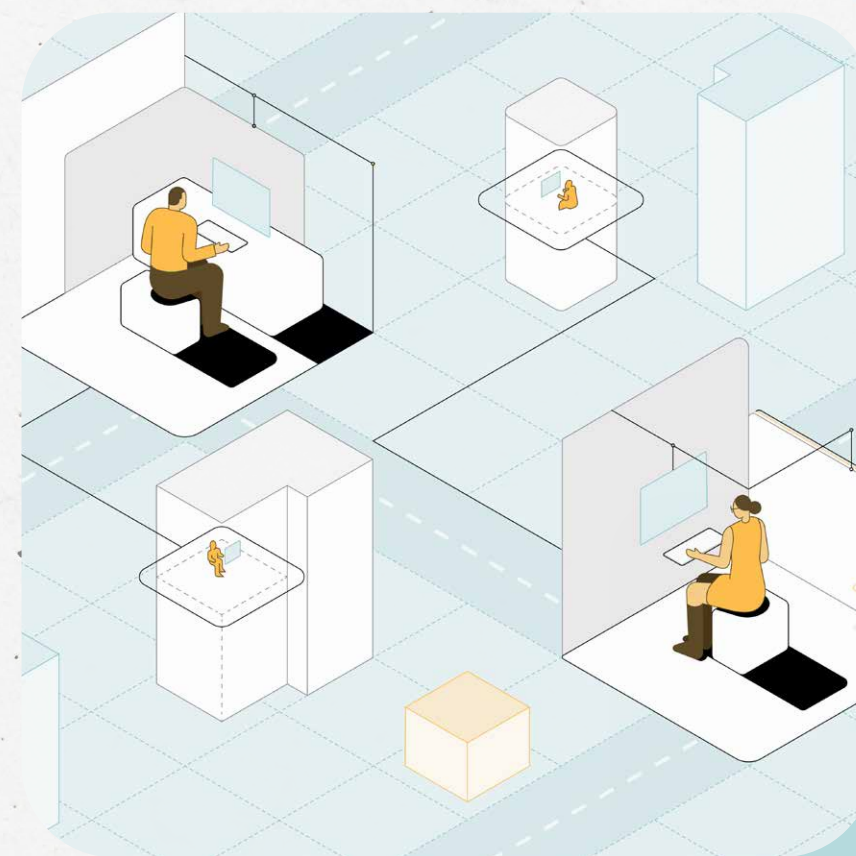

GRAPHISOFT  
**BIMcloud®**

**EFFORTLESS  
ONBOARDING  
AND SHARING**

BIMcloud is a secure, scalable collaboration platform for modern architectural and engineering workflows. With powerful new tools that simplify sharing, streamline migration, and enhance user management, BIMcloud SaaS helps teams stay connected, productive, and focused on what matters most: designing great buildings.

## **Collaboration that feels effortless**

Experience working together without friction, delays, or limits. With BIMcloud SaaS, your team can collaborate securely from anywhere, scale effortlessly, and rely on Graphisoft to handle hosting and updates.

## **Sharing is easy**

Looping in external partners, consultants, and clients is easier than ever. Public links let you share BIMcloud content instantly. No licenses and no setups mean no barriers to success. It's collaboration that's as open and agile as your projects demand. (Watch for this feature's gradual release by the end of 2025.)

## **Onboard without headaches**

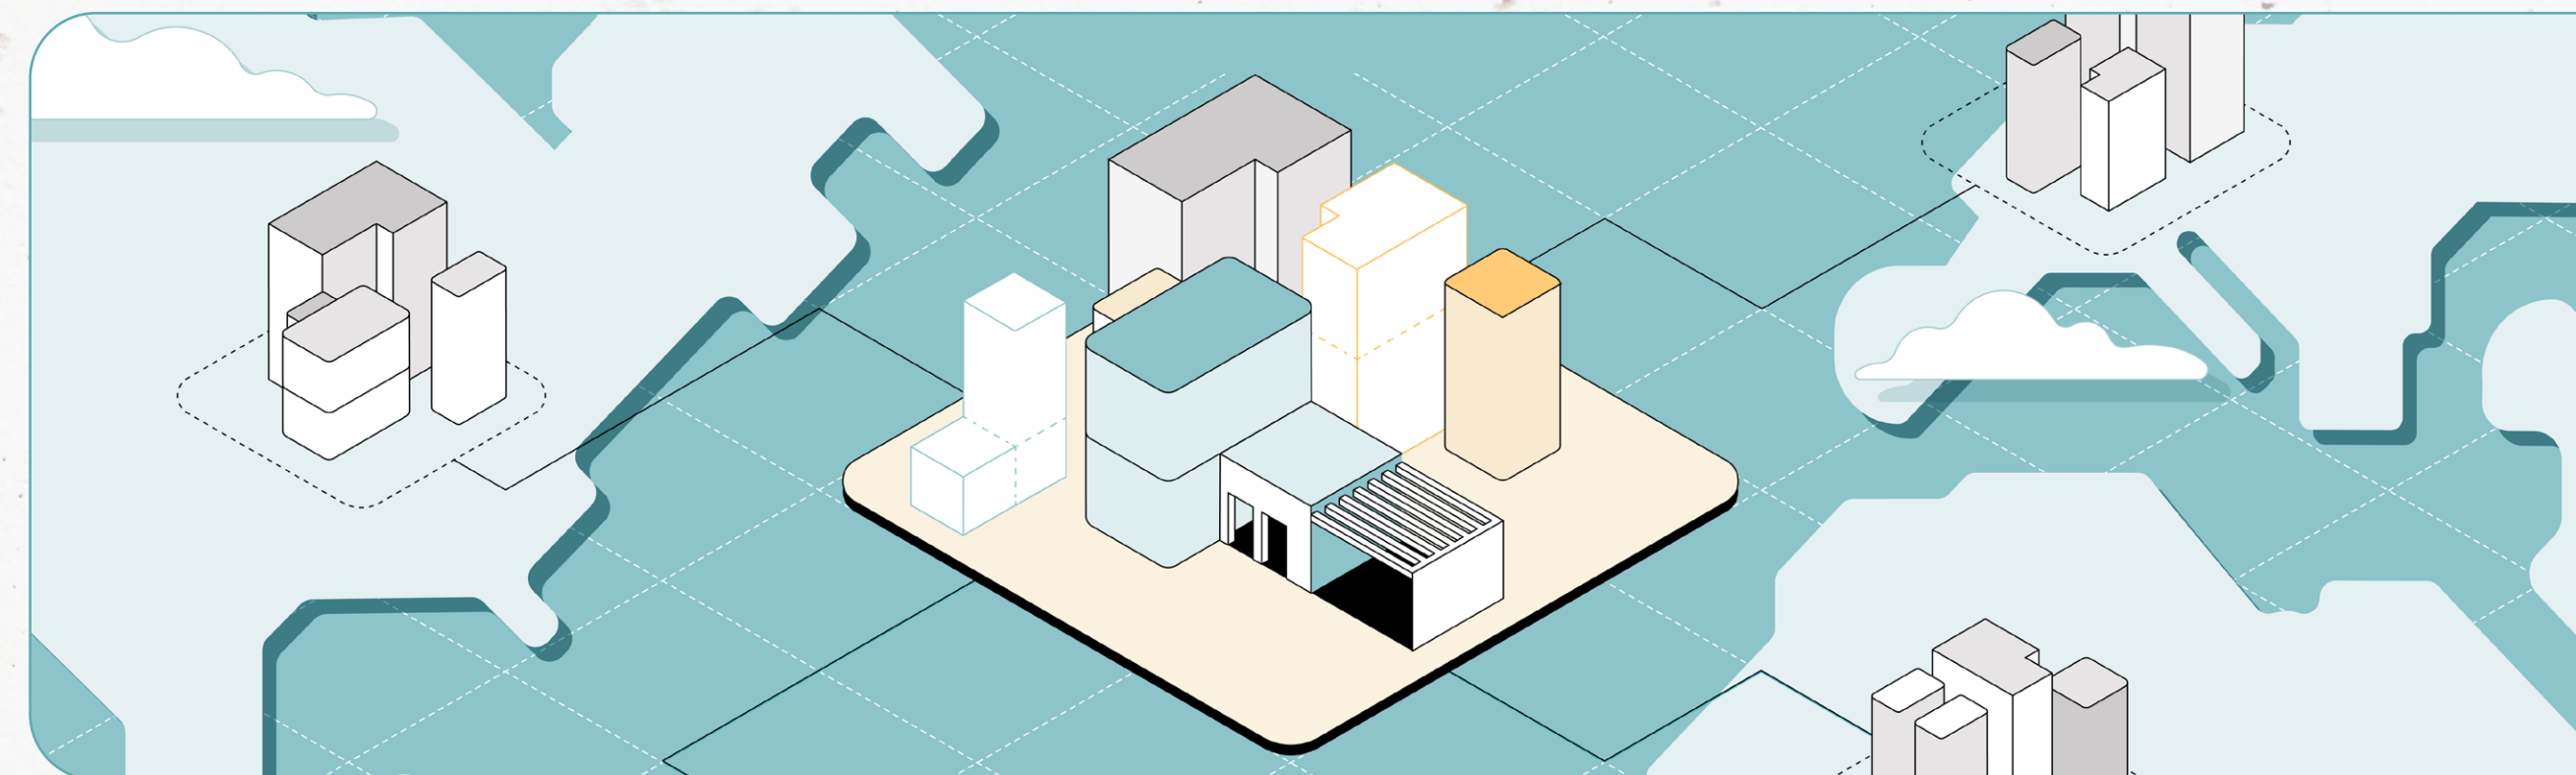

No more chasing permissions or waiting for users to accept invites. BIMcloud's smart syncing lets you set everything up before your team joins, so they're ready to work. It's proactive collaboration that keeps momentum going.

## **Faster administration with multi-core BIMcloud Manager**

Multi-core BIMcloud Manager boosts performance by parallelizing core tasks across CPU cores, maximizing hardware use. This ensures faster, more responsive administration and smoother workflows—especially in large deployments—delivering superior performance and stability for paid on-premises licenses.

## **Move to the cloud without the stress**

Switching platforms shouldn't slow you down, and migration doesn't have to be complicated. BIMcloud's dedicated assistant tool makes your transition smooth, simple, and worry-free, so your team stays productive.

## WHO IS BIMcloud FOR?

BIMcloud is built for teams who thrive on collaboration, speed, and precision. It empowers them to work smarter, scale faster, and stay connected, no matter where they are or who they are working with.

### **Architecture, MEP engineering and design firms**

BIMcloud supports real-time teamwork across disciplines and locations from concept to construction, keeping everyone aligned and projects on track.

### **Project managers and coordinators**

Manage access, roles, and workflows with ease. BIMcloud gives you complete control over collaboration, so that you can focus on delivery, not administration.

### **IT and operations leaders**

Enjoy the freedom of a cloud-hosted solution that's secure, scalable, and maintained by Graphisoft, eliminating infrastructure headaches and reducing overhead.
