

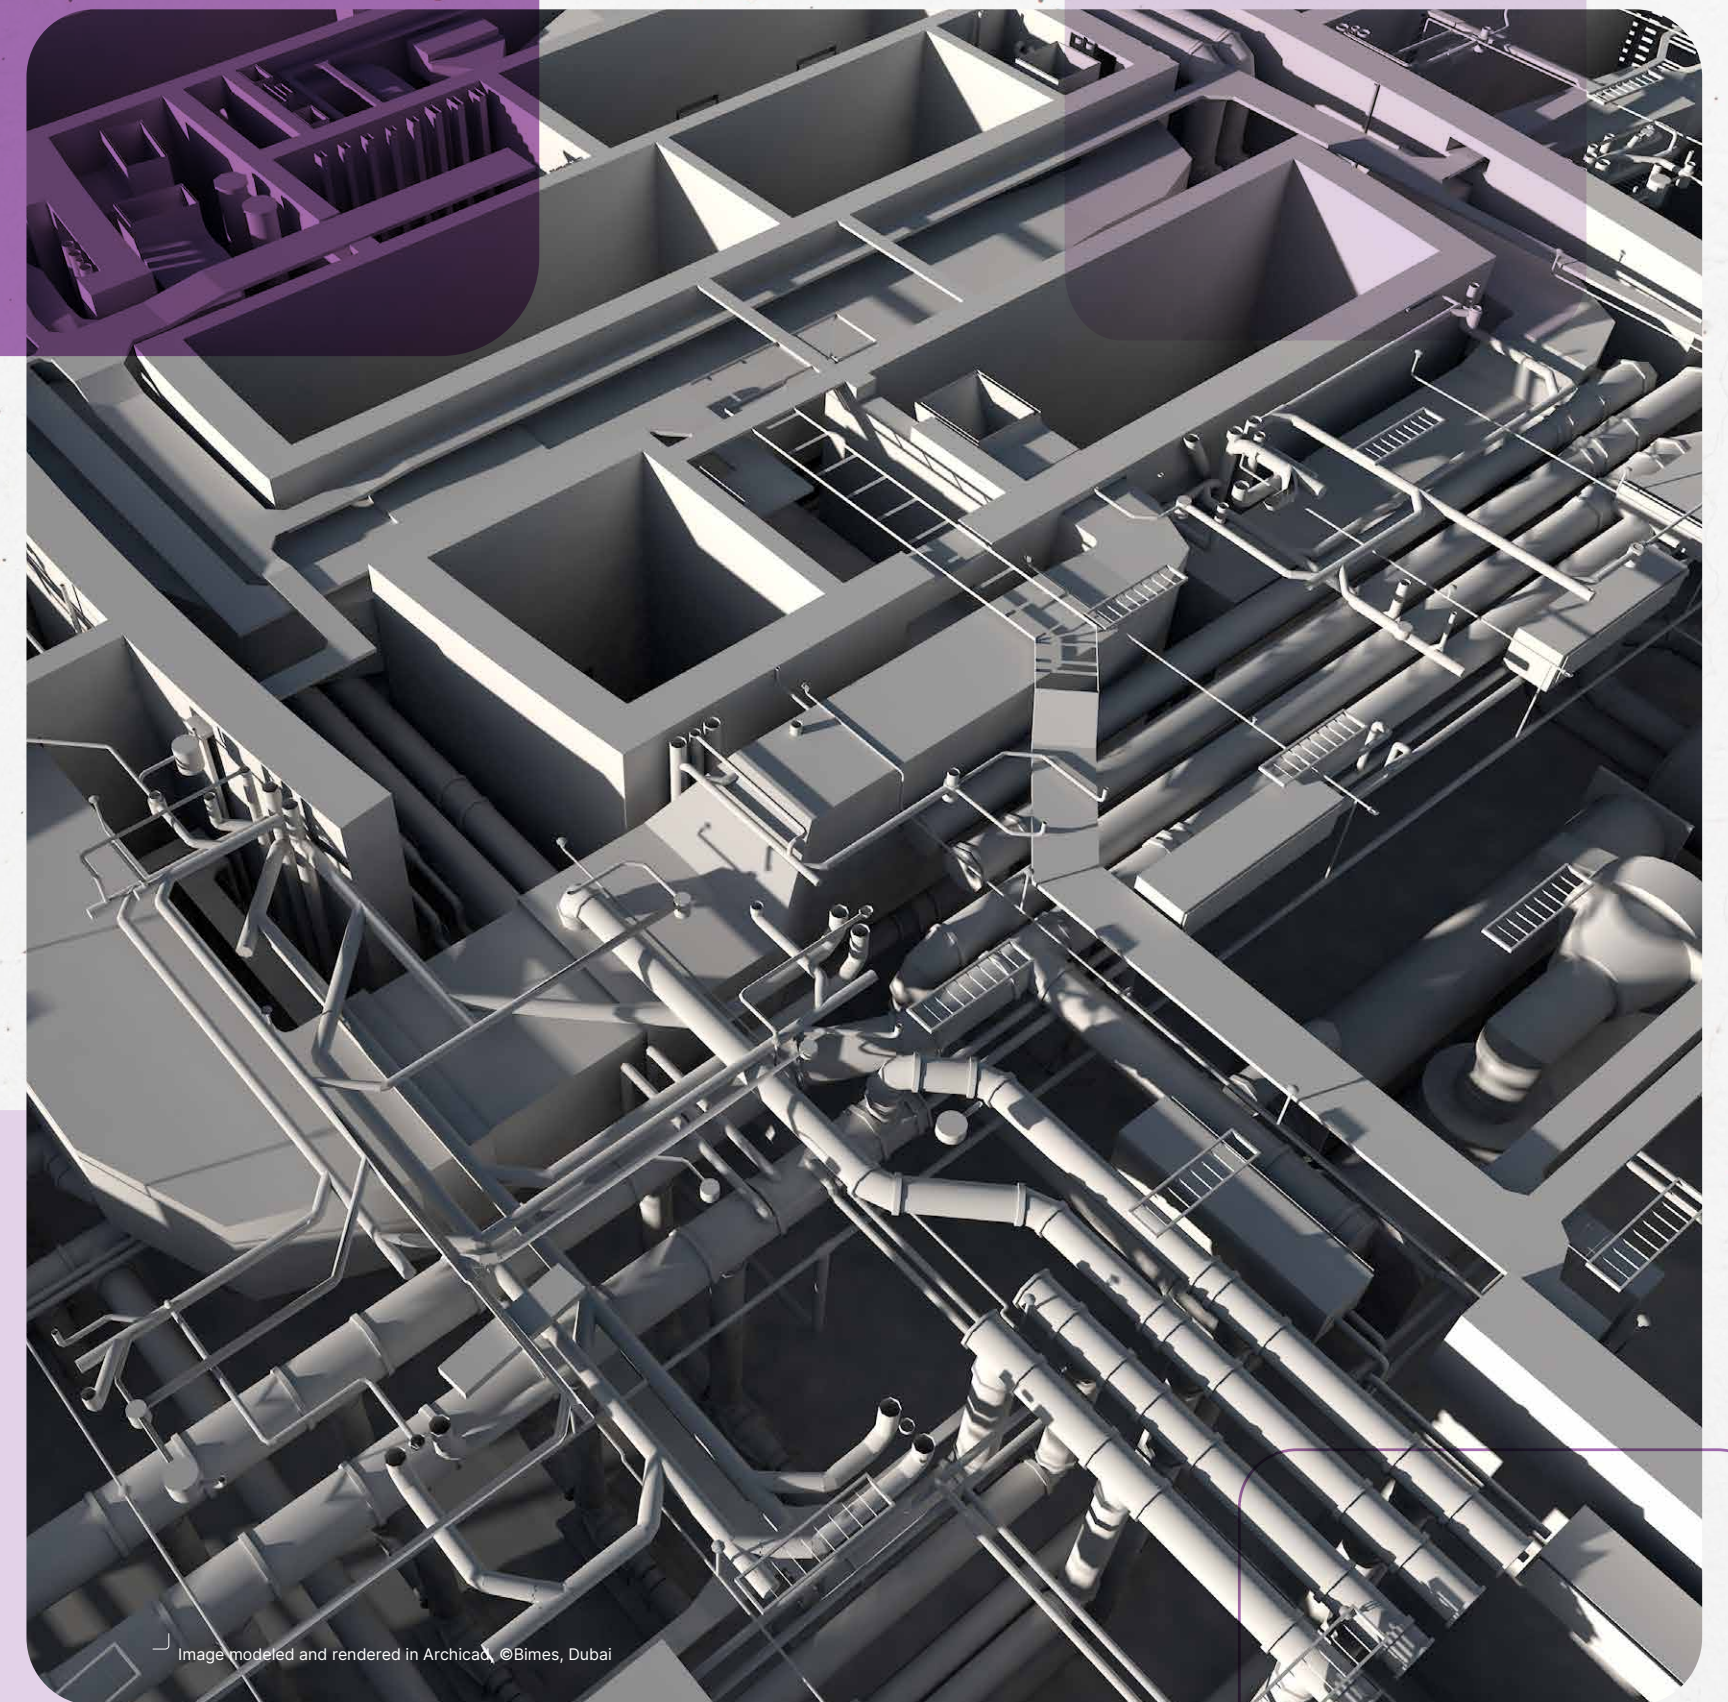

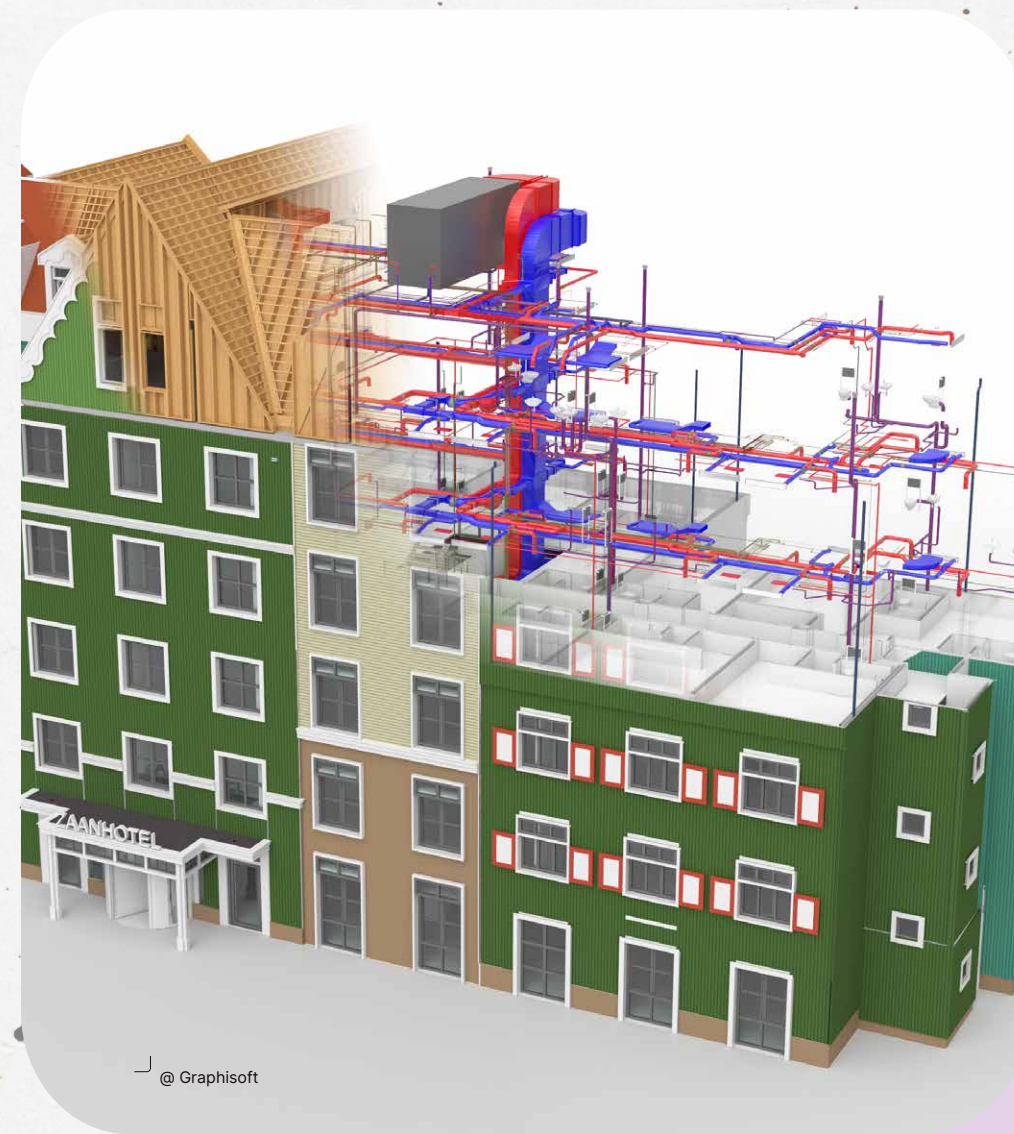

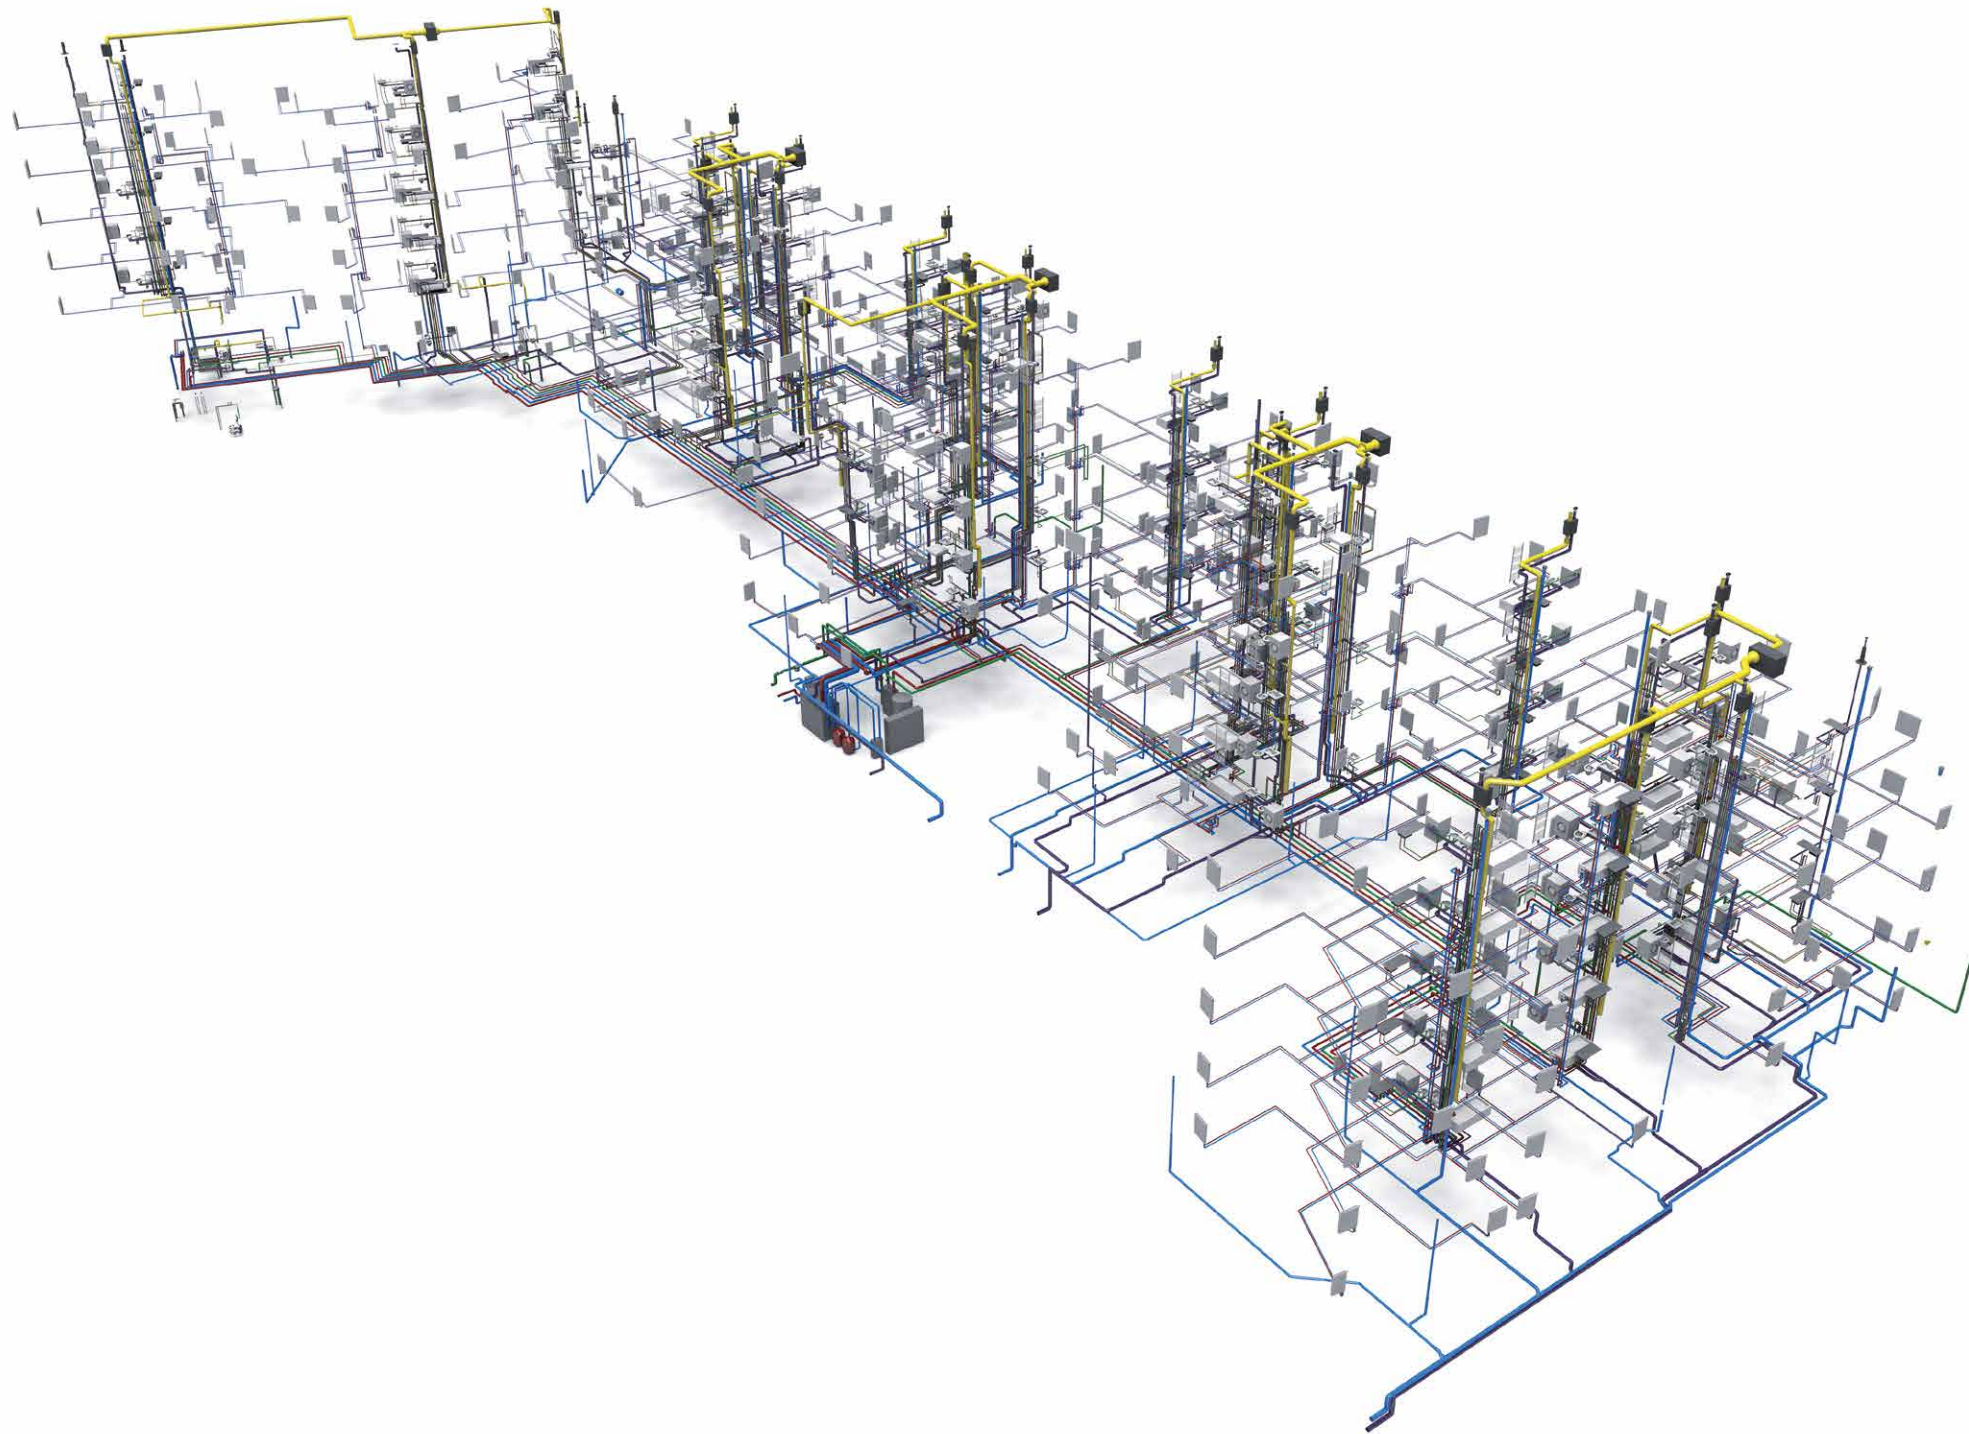

GRAPHISOFT
MEP Designer™

**INTUITIVE MEP
POWERED
BY BIM**

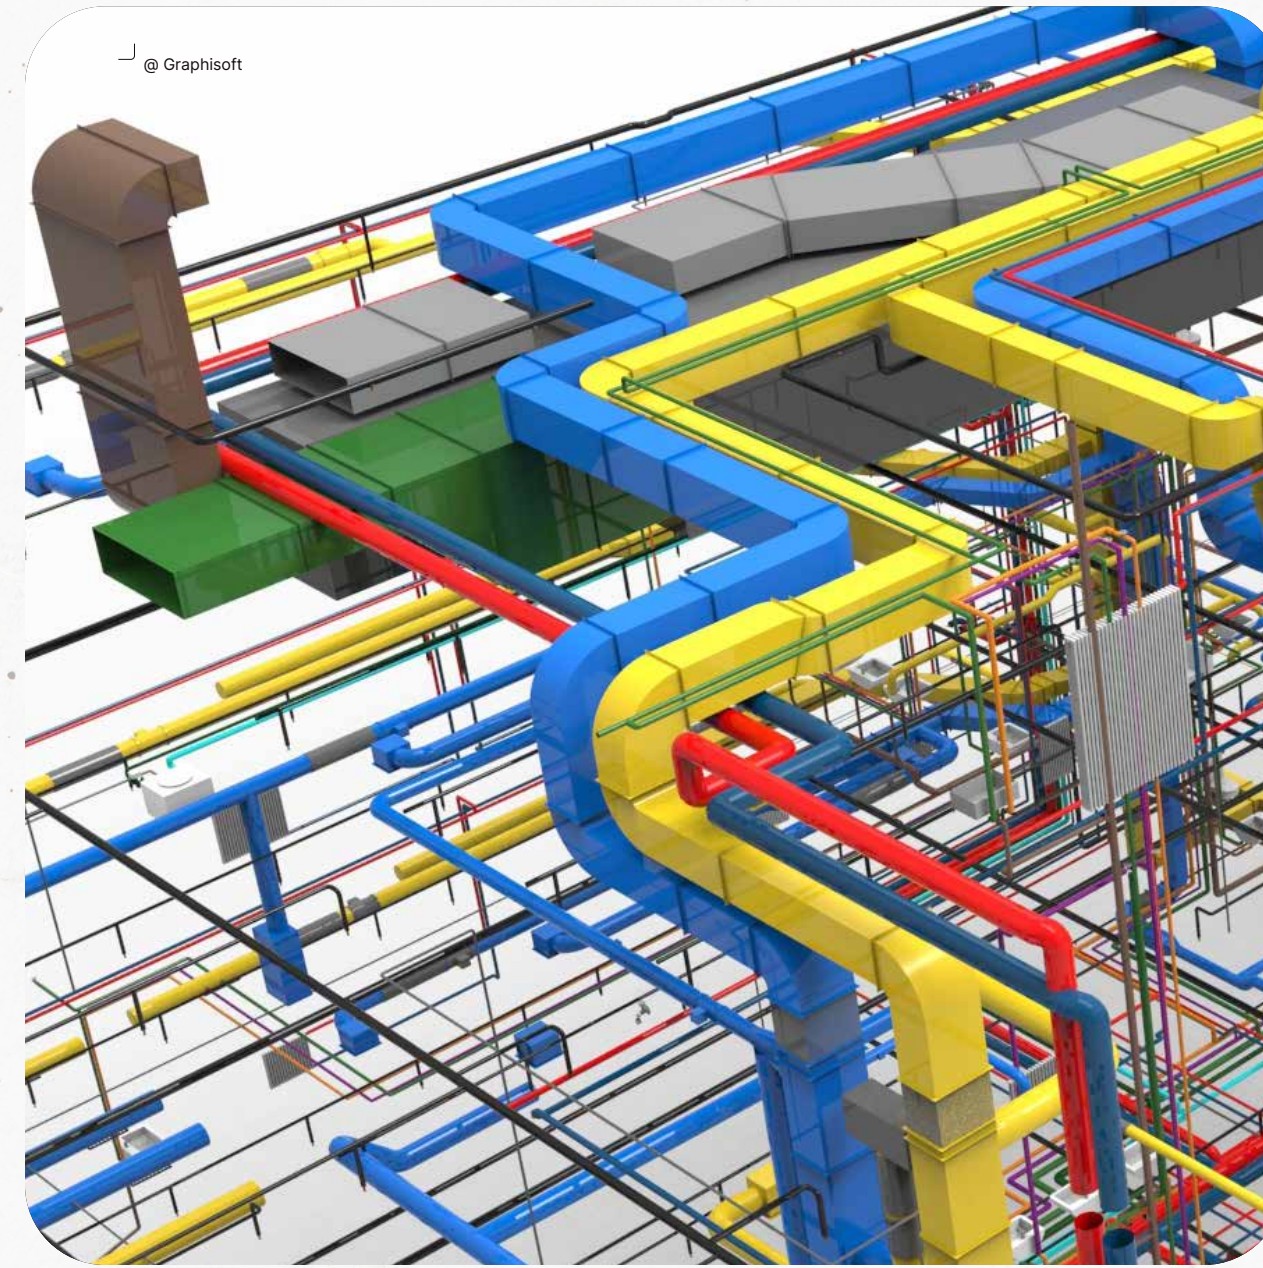

WHY MEP Designer?

Whether you want to design mechanical or plumbing systems, you need software that works like you do: practically, reliably, and ready to handle real-world projects. MEP Designer helps you move beyond outdated CAD workflows and into a modern BIM environment—without the steep learning curve.

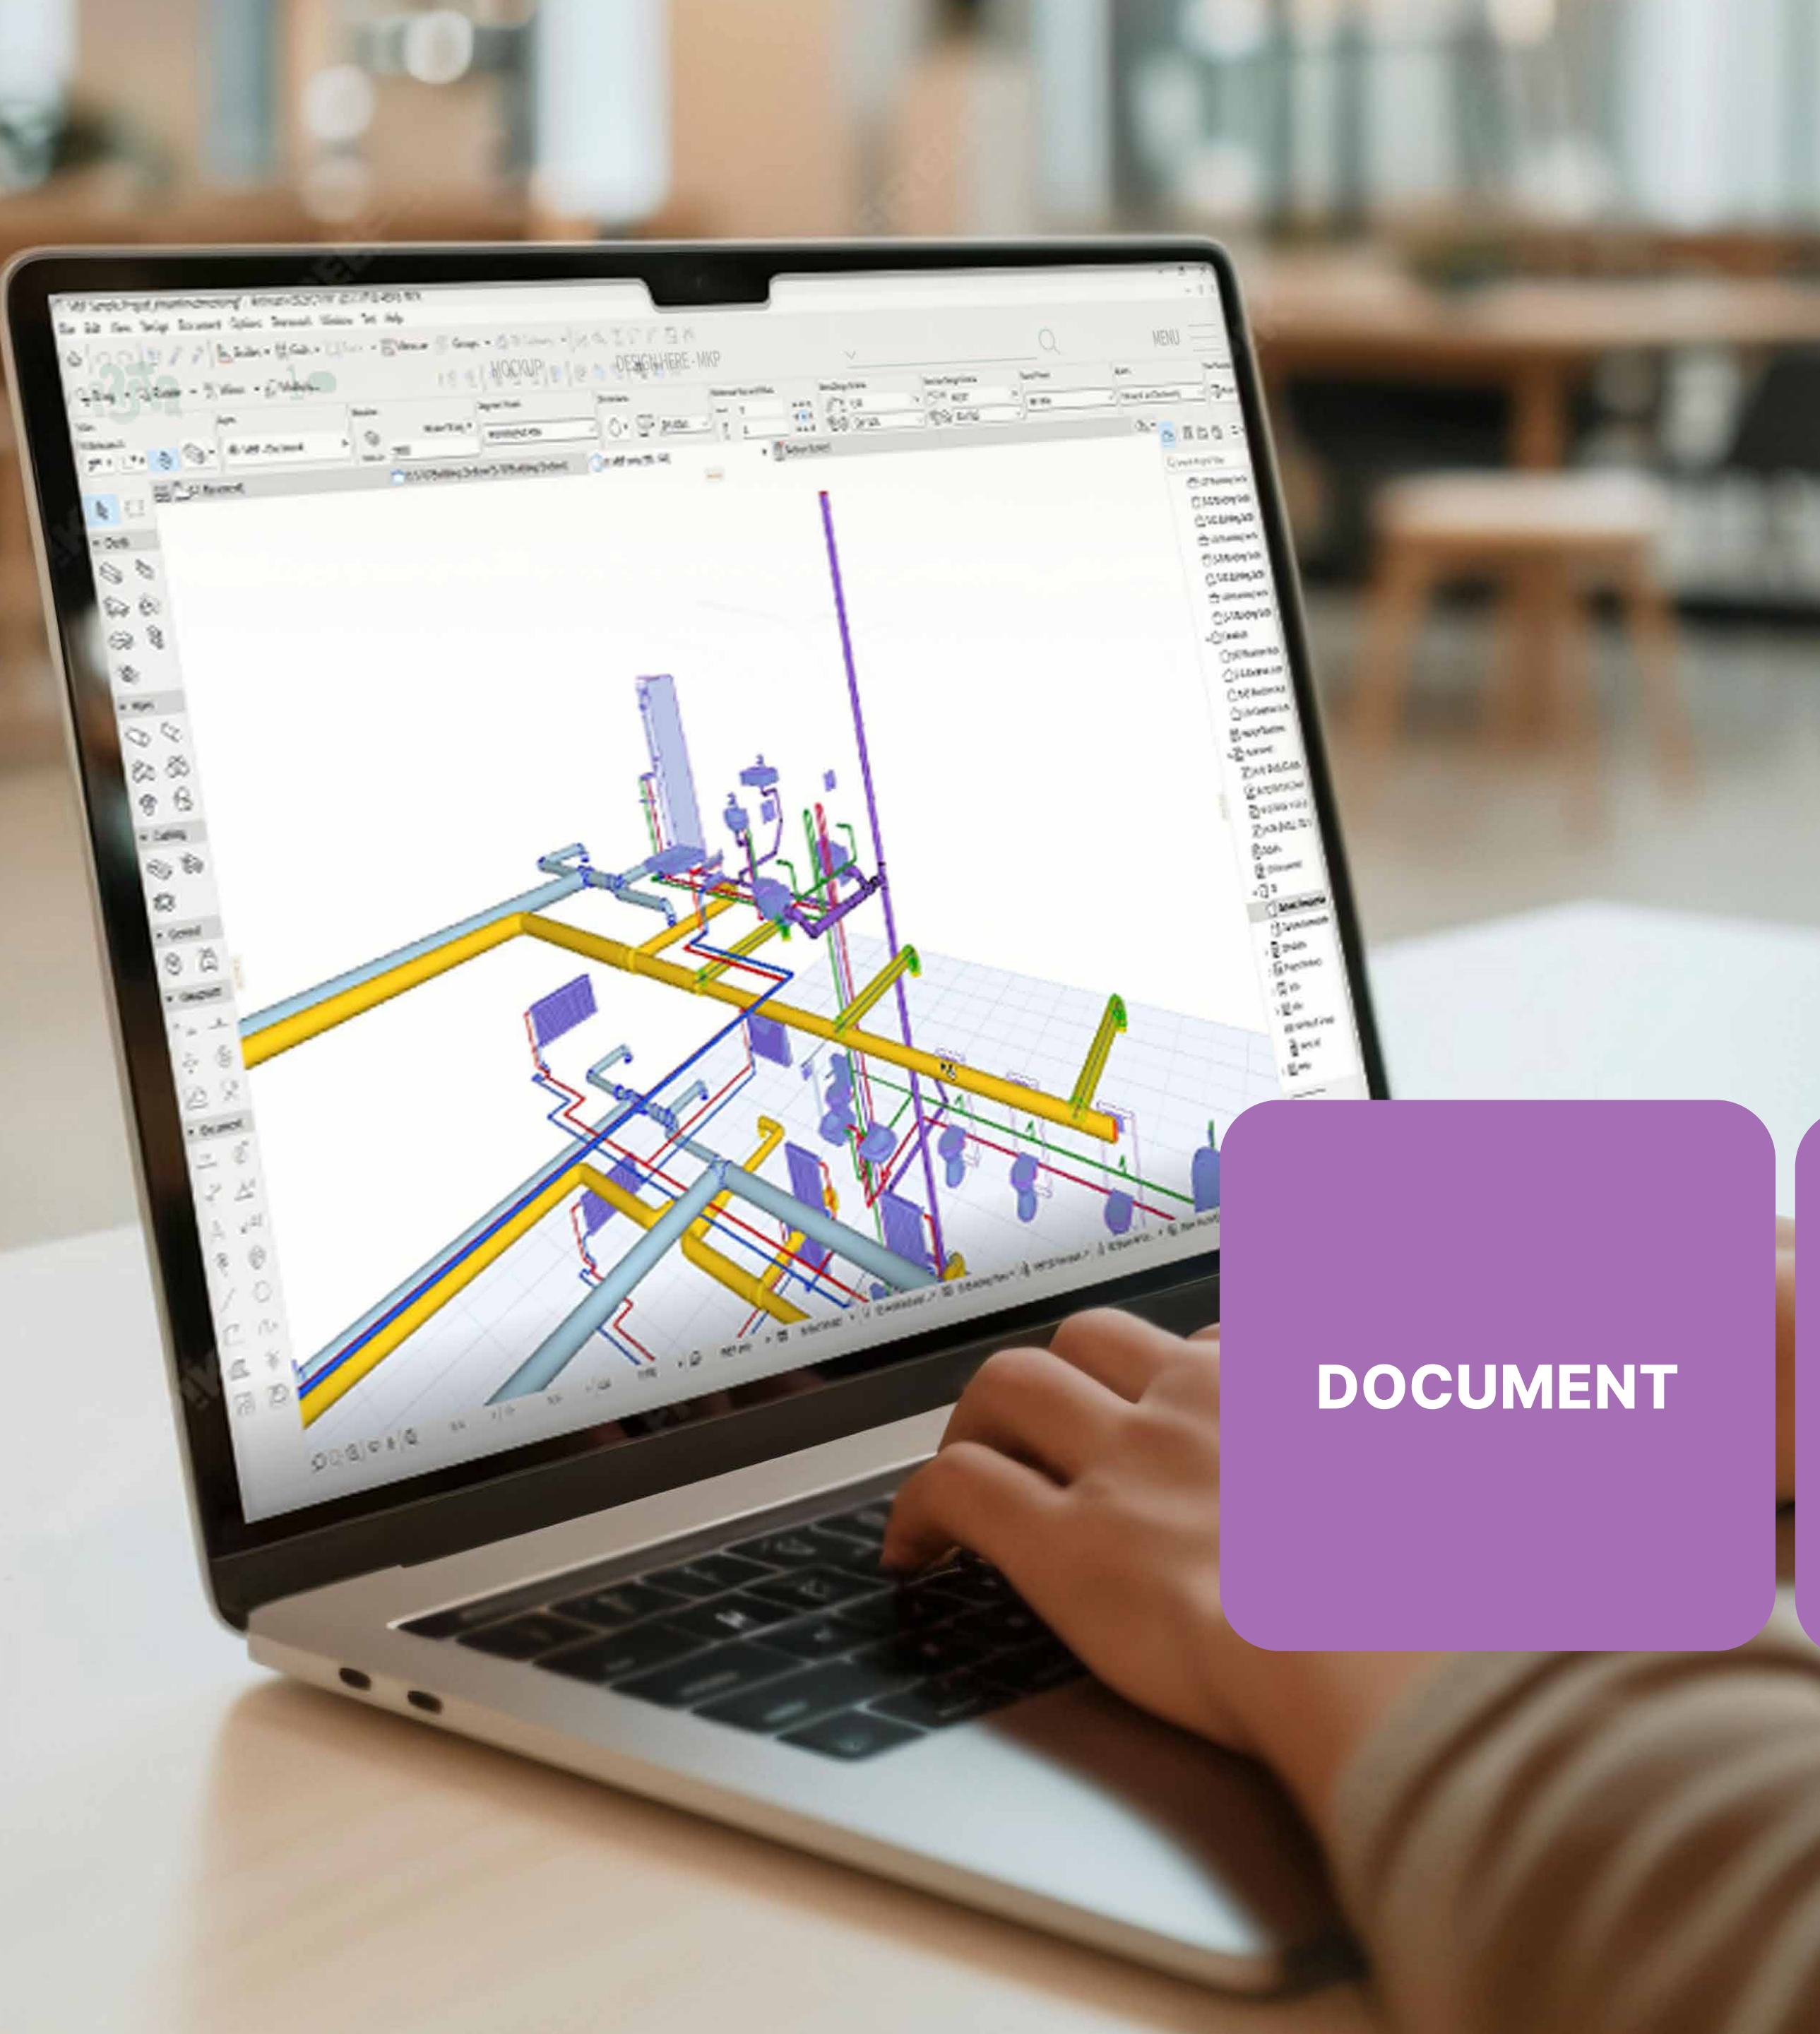

— @ Graphisoft

WHO IS IT FOR?

MEP Designer is ideal for:

- MEP engineers transitioning from 2D/3D CAD to BIM
- Multidisciplinary firms using Archicad
- Teams seeking better coordination and fewer errors
- Engineers who value speed, clarity, and control

WORK SMARTER, NOT HARDER.

MEP Designer helps you create accurate system layouts in a modern BIM environment. Its intuitive interface and smart automation let you focus on engineering design, instead of spending more time configuring software settings.

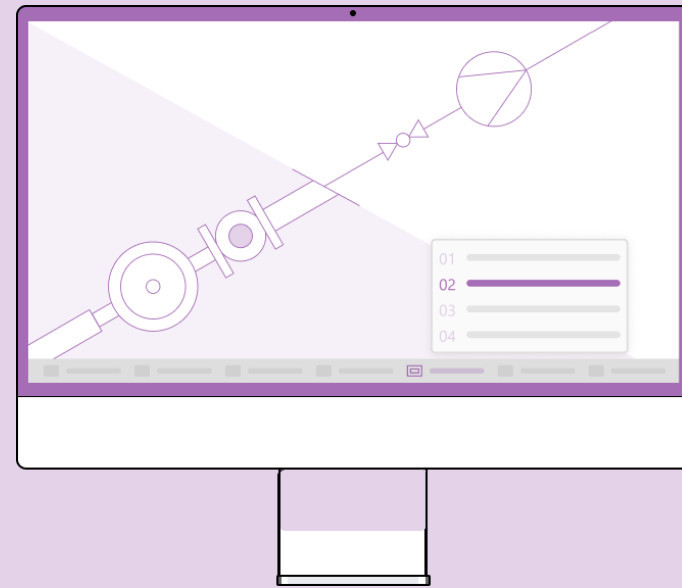

DOCUMENT

COLLABORATE

VISUALIZE

DELIVER

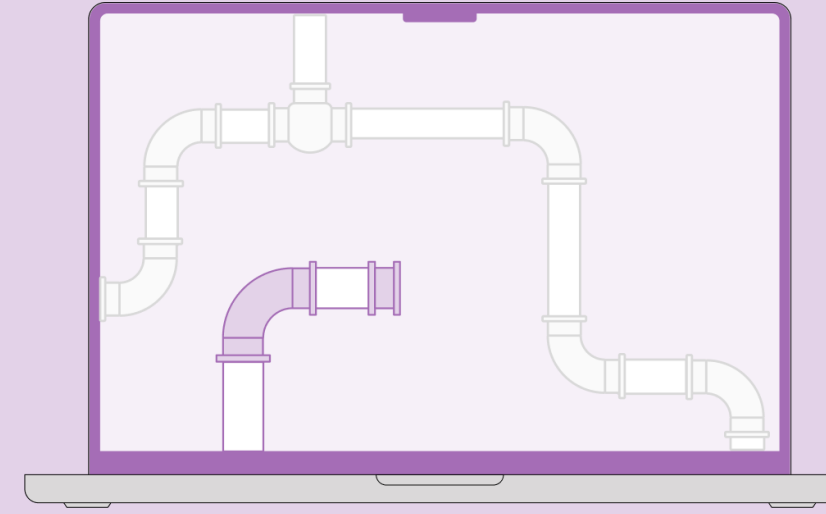

DOCUMENT

Get it right the first time

Generate detailed documentation automatically—from floor plans and sections to schedules and parts lists. Everything is customizable and ready for submission.

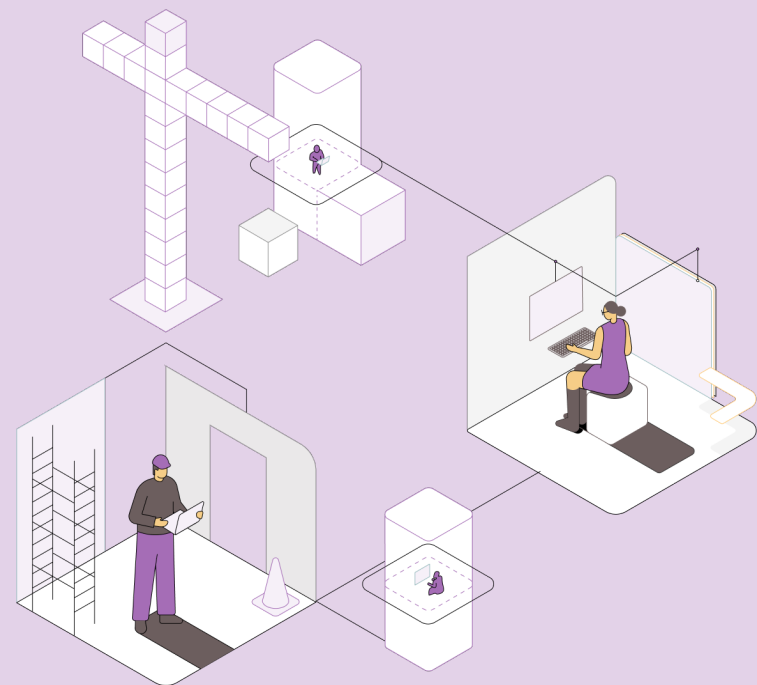

VISUALIZE

See the whole picture

Design with clarity using built-in visualization tools and parametric libraries. Spot issues early and make informed decisions with real-time feedback.

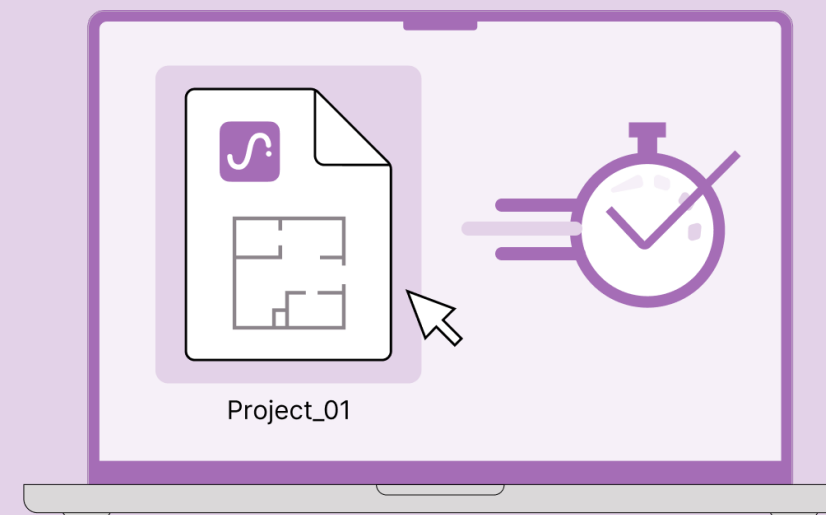

COLLABORATE

Stay in sync

Coordinate seamlessly with architects and other stakeholders. The MEP Designer ensures smooth communication and model consistency, for both on site or remote work.

DELIVER

Built for real-world results

MEP Designer runs on both Windows and macOS, making it easy to integrate into your workflow. From HVAC to plumbing design, you'll get the job done quickly and accurately.

WHY CHOOSE MEP Designer?

- Easy to learn, powerful to use
- Works on macOS and Windows
- Fully compatible with Archicad and OPEN BIM
- Designed for real-world engineering workflows
- Backed by Graphisoft's Design Intelligence Strategy

READY TO GET STARTED?

MEP Designer is available as a standalone solution or as an integrated extension of Archicad with an Archicad Collaborate subscription.
